7	Morning Sunrise Chai Lg		\$9.3K	LM	Morning

SPECIALIZATION STRATEGY

Each store owns a shift. Avg ticket is virtually identical across all 9 store–shift combinations — max spread of \$0.36. The competitive edge is not price: it is traffic volume. Lower Manhattan leads the morning with 29,455 transactions (7.1× its own evening volume). Astoria leads both afternoon and evening, sustaining the most balanced distribution of the three.

The strategy is specialization, not correction. Instead of trying to fix weak shifts, each store should double down on its winning shift — stocking the products that already drive its peak traffic.

Priority: Lower Manhattan → Sustainably Grown Organic Lg, Dark Chocolate Lg and Latte Rg in the morning window. Astoria → Dark Chocolate Lg and Sustainably Grown Organic Lg for afternoon, Sustainably Grown Organic Lg and Dark Chocolate Lg for evening. Hell's Kitchen → Civet Cat and Sustainably Grown Organic Lg in the morning where it holds its highest traffic share.
