How players explain team performance

SQUAD AVG RATING CORRELATES WITH TEAM RESULTS · UPDATES WITH FILTER

INSIGHT — Select a team · Select a season

A squad with a **higher avg rating** tends to deliver **stronger results** over the following seasons. Rating evolution does not guarantee performance, but teams that consistently improve their squad quality tend to see the impact on the pitch in the seasons ahead.

CONCLUSION - WHY THE PREMIER LEAGUE BECAME THE WORLD'S MOST WATCHED COMPETITION

The most dominated league averaged a gap of 10,8 pts between 1st and 2nd place across the selected period — the widest margin in this dataset. The most competitive league averaged just 5,8 pts, showing that no single team consistently pulled away from the rest. Spain LIGA BBVA sits in the middle (5,8 pts), but for a different reason — its gap is driven by the two highest-performing clubs across all leagues, with season winners averaging 83,0% aproveitamento, compared to an overall avg of 87,3% across all leagues in the selected period.
